APRIL 2024 REPORT

This Month of April 2024 all our patients arrived at the Foundation to check their vital signs. I started at 8:00 am checking their blood pressure and blood sugar level and treating them. I rounded up at 300pm every day.

The Doctor visited our patients on the 17th of April 2024., He examined our patients and diagnosed them while I checked their blood pressure and blood sugar levels. After the doctor's examination, Six (6) patients had high blood sugar levels, and eight (8) patients had both high blood pressure and High blood sugar levels. The other patients had severe pains and other sicknesses like Malaria and Typhoid. They were examined and treated.

They all were encouraged to continue taking their drugs, it would be fine. Our Patients with high blood pressure at the range of 178/106mmHg reduces to 139/93mmHg, while those with high blood sugar levels at the range of 212mg reduce to 160mg.

This month of April 2024 two hundred and twenty-five (225), were checked for blood pressure and eighty-eight (88) were checked for blood sugar level.

The condition of our patients was good.

Thank be to God Amen.
